In the midst of a post-apocalyptic world where the many natures once threatening the human race has died out, there is no longer a need for the protective barriers and walls erected by man. The race of man has since lost interest in the land, and has remained in the cities in human conflict. The green life around us has gradually faded away. Humanity is building settlements on the soil, and collecting on the forest for everything. But nature is losing the protection of human barriers, one by one. The human race is in a desperate state, and needs to think of restoring its land to a more harmonious state. We are using the magic of nature as the means to make this happen. Our vision is to bring back a new life to the natural world. Creatures are what make a monster dungeon. Monsters are what make a fantasy dungeon. Make your game monsterier with Monster Grin's Monster Character Tokens. Every token in this pack is usable as both monster tokens and player tokens. Select this pack to add a whole bunch of monsters to your game for your players to encounter, and to add crazy cool NPCs to your game for your PCs to interact with. With these tokens, the world you have imagined can now be truly complete. Monster Grin is the master of monstrous, fantastic, and fantasy token creation, and this pack contains over 150 monster tokens (including 15 bosses) ready to transform your game. These tokens were conceived from real-life monster designs and are fully compatible with your existing monster rules. Each token comes as a set of images. The tokens can be set as player tokens (in the case of NPCs), monster tokens, or boss tokens. The images can be set to be either visual or ethereal. The tokens come complete with alternate tokens for visual and ethereal eyes, and colored hair to fit each token set and ruleset. The tokens have a stellar compatibility list and are designed to work seamlessly in any game world. You can use any of the monster tokens in the pack as a player as well as a monster. We also included a handful of optional tokens for extra flavor and fun that will add a new dimension to your game. Enjoy! "What are you... a human!" - The Fifth Element "You know nothing of the ways of KAABOOM!" - The Fifth Element "Thou! Hast got me into a lot of trouble!" - The Fifth Element "My name is KAABOOM, and I demand thou pay me tribute!" - The Fifth Element "Which one of you is the American chicken?" - The Fifth Element "You do realize that you're talking to the giant chicken!" - The Fifth Element Monstrous Character, Volume 3 Make your game more monstrous with Monster Grin's 250 unique new tokens! Heroes, Villains, Villany, Weirdos, Deviants, Monsters, and Monstrosities await your muse. These tokens will amp up the horror potential for your game and will serve as needed companions for any fantasy dungeon, wicked manor, or unsettling location. What's new in Children Of The Nile: Enhanced Edition:

Up until this point in time, storytellers around the world have been telling tales for centuries and they all seem to fall within the so-called “spinning mirror” genre, of which one of the very best was The Odyssey, the epic ancient Greek poem. Written by Homer in many fragments and verbally passed down from one generation to another, The Odyssey came to human consciousness in a mere two centuries, not the 15,000 years that it took us to publish such a masterpiece. The novel The Golden Pearl was first published in the 7th century, but I know of it, and maybe you know of it, from thousands of years later, but it is set in Babylon, which is the most ancient civilization we know of, and it was one of the first ones we came into contact with. They were an ancient culture at the time in which Christopher Columbus and his crew of Europeans who set sail for the New World, Oceania, Asia, and America, were coming up from the southeast. It was always a mystery how these first people stayed ahead of the others, who were newer and more homogeneous of cultures. The Golden Pearl is a tale of genesis and a tale of development. I have read it in French, in English and a few times have encountered it in the original in German, but I am sure that most of you know it. The plotline of the novel it holds together best in the English version. It is an adventure about discovery and fulfillment. The journey starts through a thrilling romance, full of enemies of love and selflessness, which in the end is about the discovery of the highest purpose and the highest duty. It starts out in Babylon before the development of higher civilisations, when the King sent out his "sea captains", as the Biblical story says. Then he also sent them to learn the trade of philosophers, poets, artisans and businessmen. Two of them started out on the journey back to their king and his fascinating story is the reason their captain is still alive. Eighteen years later, Homer, the same sea captain who had learned about the arts of business was still practicing it. He had opened a tavern which attracted a lot of customers at all times of the day and night. It was always busy and at the same time he was a successful craftsman and had gained fame as a good bartender and conjurer. One day a band of beautiful girls came in, ordered food and drink and sat down in the

•Fight your way through the Thompson estate to survive. •Discover the mystery of this house. •Explore the creepy mansion, secret rooms and scary chimneys. •There is no visible death in the game - the player is given a choice in how the character dies, creating different endings. •30 unique endings. •Game contains various household objects, which make solving puzzles easier. •Game contains tools, which help you to figure out what to do next in a puzzle. •Actors: Mark Thompson, Richard Van Norstrand, Jon Harvey, and Daphne Murdoch. •Music: A song "Helpless" by the band Axil

•Gameplay: the puzzles in the game and story are directed around the themes of discovery, paranoia, and technology. •Research: All puzzles were strictly rooted in reality, all locations and artifacts were photographed and all figures and characters were researched.

Note: The graph here compares the overall weight change for each test system for a male and female model running both the unsupported 3DTouch and the Oculus Rift (CV1). The figures have been converted to the new Oculus terminology where the main menu supports 3DTouch but not Rift and 3DTouch supports Rift but not main menu. Generally speaking, weight loss (3%) for both males and females is a good thing. What is apparent, however, is that the 3DTouch, which isn't supported in the main menu area for Rift usage, is now losing weight slower than Rift. Generally speaking, weight gain (10%) for both males and females is also a good thing. What is apparent, however, is that the 3DTouch is now gaining weight faster than Rift. There was a point here where the weight gain became uncontrollable. Based on the changes we've posted since, it is apparent that the Rift is clearly being more successful in this regard. These changes may seem minor but they actually are for the most part, and it does make sense for the OSS community to be concerned about these things. After all, your body isn't perfect, and if something isn't working, how will you know what to change? On the Oculus Store: These updates are made much easier by the fact that these updates can be made on the Oculus Store for users to see. The OC4AR team has been in contact with Oculus VR to make this a reality. We expect to have the OC4AR compatible versions on
