What's New in the?

2D and 3D Geometry Handling: Easily maintain and save geometry in multi-edge and multi-face models. Move, rotate, resize and delete multiple vertices and faces with one tool (video: 2:12 min). 2D and 3D Visualization: Draw isometric views of 2D and 3D models directly in the modeling environment. Quickly and easily switch between orthographic and isometric views, with the click of a button. Create orthographic and isometric views of 2D and 3D models. Create direct orthographic and isometric views of 2D and 3D models, with one click (video: 2:45 min). Moves and Changes, and NetCDF Files: Moves and Changes is a brand new 2D and 3D editing toolset. Move and change single vertices, edges, faces and models. NetCDF files are designed for sharing geospatial data. NetCDF files are much more than Excel files. (video: 1:45 min.) Xrefs: Xrefs are 2D and 3D versions of NURBS (non-uniform rational B-spline) surfaces. Xrefs are ideal for 3D modeling. Choose to display or hide xrefs, make them gray, view them in isometric, orthographic or 3D views. Create and edit xrefs in 2D and 3D (video: 1:45 min.) Surfaces: Make 2D and 3D shapes with surfaces. Create and edit surfaces with the click of a button. Make, edit and delete surfaces and surfaces by vertex count (video: 1:18 min.). Surface Editing: Edit and delete surfaces, move, resize and mirror surfaces. Create and edit surfaces with a click of a button. Create a button for any command you can select. (video: 1:18 min.) Mesh & Modeling: Select model and mesh components, groups and solid components. Separate solids into groups. Split or merge groups, solid components, meshes and mesh components. Create and edit meshes and mesh components with the click of a button. (video: 1:12 min.) Clipping: Simplify geometries with the click of a button. Use the "Clip to" tool to quickly clip and merge
