In Japan, however, they know that if they're going to achieve lasting success, it's crucial that they embrace the best of each other. As such, elementary and junior high schools have been integrated in some of the country's best private schools. With a unique sense of culture and fun, these schools are aimed at cultivating future leaders. They are often staffed by a small number of professors and teachers in the field, or by the founder's children, who are eager to cultivate the best of their parent's and grandparents' work, while also modeling a new school that is relevant to the needs of Japanese youth. Of course, the approach still requires a solid academic foundation, which is something that is supported by a host of extra curricular activities that make traditional learning interesting, while cultivating basic literacy and basic scientific understanding. A hands-on approach Do you want to know more about these schools? Check out: Overseas The most well known of these private schools is rather ironic: The Eton College. The school opened in England in 1562, and
